Job Title | Summer Internship, OTC, Ogden, UT
Starting Date | 
Location | Autoliv Ogden Technical Center
Your Responsibilities
Autoliv, Inc., a world leader in the manufacture of life saving devices, is currently accepting applications for paid, full-time engineering internships for the summer of 2017 at Autoliv’s Ogden Technical Center (OTC) located in Ogden, Utah.

Internships are available in groups that design, develop, and/or analyze airbags and their sub-components. Interns will be working with experienced engineers to develop and improve current airbag module components, designs, and assemblies. The intern will be required to build airbag modules and components, perform tests, perform functional and engineering analysis, design components and/or fixtures, collect data, write test reports, prepare and make development presentations under supervision from current engineers.

Your Profile
Qualified candidates will be in their junior or senior year pursuing a technical engineering degree (mechanical, electrical, or chemical).

Successful applicants must have strong engineering and communication skills, be able to work with little supervision, have a good work ethic, be a team player, follow through on commitments, have design aptitude, be a visual thinker, be detail oriented, and have an ability to prioritize and manage multiple tasks.

What we offer
Work in international teams on innovative products
Very good working climate
Attractive compensation package
Career development programs
