Faculty Position
Department of Mechanical Engineering
Brigham Young University

The Department of Mechanical Engineering at Brigham Young University is seeking outstanding faculty candidates who will challenge our talented student body and contribute to our excellent research programs. Candidates in all areas of expertise will be considered; candidates in the areas of thermal/fluid sciences and CAD/CAX are especially encouraged to apply.

The department has a strong research program with state-of-the-art facilities in supercomputing, electron optics, acoustics, microelectronic fabrication, and manufacturing processes. We have excellent research programs in compliant mechanisms, MEMS, autonomous vehicle control, multidisciplinary and parametric design, CAD/CAx (computer-aided applications) tools, friction stir processing, global product development, acoustics, combustion, microfluidics, biomechanics, microstructure design, and experimental and computational fluid flow physics. Successful candidates will be expected to strengthen undergraduate and graduate education and to develop an outstanding research program to complement existing research or develop new research areas.

Current department educational initiatives include a focus on technical excellence, innovation, leadership, and global engineering. The National Survey of Student Engagement placed BYU in the 93rd percentile for level of academic challenge, 91st percentile in fostering active and collaborative learning, and 99th percentile in providing a supportive campus environment. The graduate program was recently rated among the top third of doctoral-granting ME graduate programs. The ACT score for the average freshman is at the 89th percentile nationally. Over 80 percent of our BS graduates plan to attend graduate school, and BYU is seventh on the list of U.S. baccalaureate-origin institutions for engineering doctorate recipients. Student teams from BYU consistently place in the top ten in national and international design competitions. Our students have an exceptional amount of experience in leadership and global settings (over 80 percent of graduating seniors speak a second language and/or have lived in a foreign country for over a year), making them well poised to become global leaders in engineering. We expect our faculty to challenge these outstanding students to reach their potential.

Successful candidates will be hired at the assistant professor, associate professor, or professor level depending on experience. Requirements include a doctorate in mechanical engineering or closely related field and a willingness to fully support and participate in the ideals and mission of BYU. Applications must be submitted online at https://yjobs.byu.edu and must include a cover letter, curriculum vitae, statement of research interests, statement of teaching interests, educational transcripts, and contact information for at least three professional references. Questions regarding the position can be directed to
Dr. Mark Colton, Faculty Search Committee Chair
Department of Mechanical Engineering
Brigham Young University
435 CTB
Provo UT 84602-4201
colton@byu.edu

Review of applications will begin on November 1, 2014 and continue until the position is filled.

BYU, an equal opportunity employer, requires all faculty to observe the university’s honor code and dress and grooming standards. Preference is given to qualified candidates who are members in good standing of the affiliated church, The Church of Jesus Christ of Latter-day Saints.
