Career Opportunity

Application Engineer – Hudson, MA
Come join our team of engineers dedicated to solving a variety of challenging and interesting measurement tasks. These tasks are as multi-faceted as our customers, industry and technology leaders, whom you will be helping to improve their products and processes.

The Company:
Polytec, Inc., the global leader in Laser Doppler Vibrometry, Velocimetry and White Light Interferometry for non-contact vibration, surface speed and surface profiling measurements, offers a dynamic, high-tech, team-based work environment, career growth opportunities and a competitive compensation plan with excellent benefits. Polytec is an equal opportunity employer.

The Position:
We are expanding in Massachusetts and looking for a dynamic, highly-motivated Engineer (degree in engineering or science related subject) to work in our Application Engineering department.

The Location:
Hudson is located near Worcester, MA, on the outskirts of Boston. The city is home to the Worcester Polytechnic Institute and is a robust, vibrant city in the heart of the Commonwealth of Massachusetts: a manufacturing and innovation giant for 200 years, Worcester combines the warmth of a small town with the convenience of a thriving city.

Why you should apply:
- Extremely interesting work environment with multi-faceted technical challenges and close customer interaction
- Friendly work environment and team oriented colleagues
- Good pay and excellent benefits

Requirements:
- Bachelor or Master degree in engineering or science related subject
- Outgoing and relatable personality
- Willing to travel up to 25%
- Responsible and self-motivated
- Strong desire to learn and better oneself
