Career Opportunity

Application Engineer – Dexter, MI
Come join our team of engineers dedicated to solving a variety of challenging and interesting measurement tasks. These tasks are as multi-faceted as our customers, industry and technology leaders, whom you will be helping to improve their products and processes.

The Company:
Polytec, Inc., the global leader in Laser Doppler Vibrometry, Velocimetry and White Light Interferometry for non-contact vibration, surface speed and surface profiling measurements, offers a dynamic, high-tech, team-based work environment, career growth opportunities and a competitive compensation plan with excellent benefits. Polytec is an equal opportunity employer.

The Position:
We are expanding in Michigan and looking for a dynamic, highly-motivated Engineer (degree in engineering or science related subject) to work in our Application Engineering department.

The Location:
Polytec Inc. is growing and moving from our current location in Dexter, to a complete new facility in Plymouth, MI in 2017. Plymouth is located within 15 miles from bustling Ann Arbor, MI. The city is home to the University of Michigan and is the state’s rare jewel: a small, friendly town with big-city sophistication; a world-class educational and high-tech research center nestled in a quintessential college town; a close-knit community of charming neighborhoods with a rich mix of cultures.

Why you should apply:
- Extremely interesting work environment with multi-faceted technical challenges and close customer interaction
- Friendly work environment and team oriented colleagues
- Good pay and excellent benefits

Requirements:
- Bachelor or Master degree in engineering or science related subject
- Outgoing and relatable personality
- Willing to travel up to 25 %
- Responsible and self-motivated
- Strong desire to learn and better oneself
